A powerful documentary about how our future depends on our youngest citizens and the quality of early care and education they receive.

No Small Matter is the first feature documentary to explore the most overlooked, underestimated, and powerful force for good in American today: early childhood education. Through poignant stories and surprising humor, *No Small Matter* lays out the overwhelming evidence for the importance of the first five years. The film reveals how failure to act on that evidence has resulted in an everyday crisis for American families, and a slow-motion catastrophe for the country.

A moderated panel discussion with early childhood education and business leaders will follow the screening
